Baby Names Worksheet	622

INTRODUCTION

Congratulations! You're having a baby.

So your looking to find the perfect name for you baby. Well, you're on the right track. This book will help you along the way to finding the perfect name.

There are lots of considerations when you're deciding on a name.

Obviously, there are no hard and fast rules on choosing a name. But, in this book, we give you over 28,000 names with meanings from 43 Origins, tips and advice for naming your baby and some of the most popular names from 2000 to 2009.

The list of Names and tips were taken from Baby Names Dictionary. It is an award winning software that will help you find the perfect name for your baby. A free copy of the software is available at <http://www.netstep-ent.com/BN/download.html>. Please use the software to make your search a lot easier.

BONUS FREE BABY NAMES DICTIONARY

This software is currently on sale at <http://www.netstep-ent.com/> for \$24.95. It is your free with the purchase of this book.

There is no need to buy it there.

This software is free with the purchase of this book.

You can download a free copy at:

<http://www.netstep-ent.com/BN/download.html>

Baby Names Dictionary is a software which contains a database of over 28,000 baby names with meanings from 43 origins.

Baby Names Dictionary goes beyond being just a searchable database of names. Just have a look at the features:

Features at a glance:

1: A searchable database of over 28,000 baby names with meanings from 43 origins. Can Search or list

- * by meaning by name
- * by origin
- * by gender
- * by starting, ending and even containing specific letters and/or
- * any combinations of the above.

2: Selected names can be added to your own selected database

3: Choose 20 of your favorite from your selected database

4: All selected & top 20 names can be printed.

5: Can add the Middle, Last and (any) other initials to come up with your babys' Initials.

You can download a free copy at:

TIPS FOR NAMING YOUR BABY

The Single Most important Tip - Think of your child's future

If you don't follow any other advice given by this book, for your Child's sake, you must follow this one. Choose the name for your baby's benefit, NOT yours. This means no joke names, puns or play on words. It may seem more interesting than a common name like Mary but would you want your child being teased and laughed at or even scarred for life because you thought it would be different? See [types of names to avoid](#). Choose a name that will grow with your child. You can do the Doctor/Lawyer/Judge test. Would you go to a Doctor/Judge/ Lawyer named...

Know what you are looking for

Are you thinking of a traditional, religious or an uncommon name? Do you want to name your baby after somebody? Would you like a short or long name? What do you have in mind? Deciding all of this ahead of time will immediately narrow down your search.

How does it sound like?

Think about your baby's name. Say it aloud. Does it have a melody? Do you think it sounds weird or out of place? Does it match your last name? Does it sound all right? If you're naming a boy, avoid names that sound feminine. Most of the time, a shorter first name will go well with a longer last name and vice versa.

Common or Unique name?

There are advantages and disadvantages in both the common and unique names.

For example, a common name like Michael is both easy to pronounce and remember but the name is common, so there is a high possibility that there might be quite a few other Michael's in your child's class or workplace. This book has a list of the top 100 names for the last 9 years. Bear in mind that, if you decide to go for a very popular name, the chances are that several of your child's school friends in later life will have the same name.

An unusual name may make your child stand out from the rest but the question is would she or he want to stand out? If your child is shy and does not like attention, this may be a problem. However, if your child likes the spotlight, then it may be a good thing. Some unusual names are hard to spell and pronounce, so although it might make them feel special, your child might have to get used to people misspelling and mispronouncing their name or even teasing from classmates. For more advice on this, see [Choosing Unusual Baby Names](#).

If your child's last name is unusual, it may be good to give them a common first name or if their last name is common, you can give them an uncommon first name to balance it out like Susan Lenser or Bevin Graham.

Relatives and friends

Many parents choose to name their babies after a grandparent, other relative, or close friend. This option can provide you with a good pool of names to consider. Take ideas graciously, but try not to let anyone know what you've decided until your baby's born; so it's too late to give in to subtle hints from relatives or friends. Remember; don't let people pressure you into naming your child something that you'd rather not.

Many parents like to honor a family member by naming their baby after them. But if this is not something you'd like to do, why not use that name as your baby's middle name so that you get to name your baby to your liking and your family's happy too.

If you choose to name your child after a parent or grandparent, or if its tradition in your family and you want to continue it, make sure that nobody else in your family has already done so. It will be confusing to have two people in the same family with the exact same name. Ask your family members if they are considering the name or saving it for their child. They may have a special bond with that person and want to honor them by naming their child after them. Sit down with them and try to find an alternative name for your child or theirs. Be regardful of your family members.

If you want to name your child after a close friend, keep in mind that however close you are, friends may change. Is your best friend the same one you had ten years ago or will your best friend now stay with you for the next ten years? Think about it before deciding to name your child after them.

Do not feel pushed into choosing a particular name by family members. Think about it before deciding on anything and ask for advice or other people's opinions. But remember this; choose wisely. If your child grows up to hate the name she or he was given, it will be you as their parents who will get the blame.

Ancestry and heritage

Your child's heritage is very important and you may want their name to show it. Or maybe you are a religious person and this may influence your choice in name. Or maybe your family has a tradition to name your firstborns after their grandfathers. If the name you've decided on does not get the thumbs-up from your family, you can consider using it as their middle name.

Honor your child's heritage and give them a name that is part of their culture. The baby Name Dictionary has 43 origins. Each contains the most popular names for that particular origin.

Meaning

Ingrid will not be treated differently just because her name means 'hero's daughter' but she may feel strong because she is the 'hero's daughter'. Your child may or may not care about the meaning of their name but it is something you should consider. Especially if you choose a name that has a negative meaning. Zona won't be very happy once she finds out that her name actually means 'prostitute'.

Initials and nicknames

When it comes to nicknames, people (kids most of all), can be very cruel. Try to foresee any potentially embarrassing nicknames. But don't expect to foresee every embarrassing nickname. Just because you missed one, it doesn't mean that somewhere along the line a second-grader won't. At least you crossed out the most obvious ones. Also, don't forget about the initials. Most parents don't think about the initials that may spell out something embarrassing. For instance, Donald Oliver Goodfellow will be more likely to be teased than Donald Noll Goodfellow.

Keep in mind your child's initials when choosing names. Let's say there's a couple that just had a baby girl. They want to name her Piper. Seems like a good name. And for her middle name, they choose Olivia. Sounds good. Now, if the couple's last name happens to be Oliath, how will Piper react when she gets older and figures out that her initials are POO? She'll be so embarrassed. And not to mention the amount of teasing she'll get when her classmates realize that too.

There are times in life when just initials are required. Make sure your child's initials do not spell out anything undesirable. Pauline Olivia Thornton would have to go through life with the initials POT. Imagine how horrible that would be for her.

Celebrity

You may be planning to name your baby after a celebrity (Real or Fictional) with an unusual name. Even if the celebrity in question is a household name at the moment, it is worth bearing in mind that ten or twenty years down the line they may not be - but your child will still be stuck with their name. Do you remember Kojak?

Keep it secret

A little advice; try to keep the baby's name a secret between you and your spouse until the baby's born. If people don't know your choice on the name, they can't voice their opinion on the name, which may make you feel that it isn't very suitable and want to change the name. When the baby is born, some parents change their minds about the

name they have chosen because they feel like the name just doesn't suit the way the baby looks. Do not, I repeat, do not tell anyone the name you've decided on because then you would have everyone's opinion on that name and that may make you doubt whether the selected name is really that suitable for your baby.

Final Advice

Keep in mind; none of these are rules that absolutely HAVE to be followed. They are just tips that we think will help you find your perfect baby name.

NAMING SUBSEQUENT BABIES OR TWINS

Choosing a name for your firstborn is hard enough, but when choosing a name for its sibling or twin, there are additional factors that should be brought to the parents' attention, such as:

Avoid names that begin with the same letter. If you name one child Jane Smith and the other Joanne Smith, it may cause difficulty in later years. Belongings of the child that have the child's initials on them may be confused with the other. Later on, a letter might come one day for Miss J Smith. This could bring about awkward situations and disputes if the contents of the letter are private and the wrong person opens it.

If you gave your first child an uncommon name, try not to give your next child an ordinary or average name. As they mature, they might wonder why their name did not get as much consideration and creative thinking as their older sibling's. Give as much thought as you gave into naming your first into naming your second.

As tempting as it is, when having twins do not give them names that are alike. Especially when you have identical twins, they will feel that their name is one of the few things that give them their individuality from their twin. Naming one Christopher and the other Christine (both can be dubbed Chris for short) is not a very good idea.

Giving your children names that are related but seemingly different is an ideal way of naming your kids. Aidan and Nadia is a good choice if you have a boy and a girl because they are actually the same word, reversed. Amy and May are anagrams. Eve and Zoe, however different they may seem, are very similar. They both mean 'life', one in Hebrew and the other in Greek.

THE TYPES OF NAMES TO AVOID

Later on in life, your child will have to say and write down their name a couple of times a day. So, choose wisely while selecting a name. If your child has a name that is too hard to pronounce or spell, imagine how it would be like for them in the time to come. Stay away from:

Cute names

However adorable a name might be to you, and it might even suit your child as a baby, she or he would definitely not want to grow up with that name. Your child may grow up to be an astronaut, or a school principal, or maybe even a respectable state senator. I don't think they'd appreciate a name like 'Fifi Trixibelle'. (Paula Yates and Bob Geldof's daughter's name) If you absolutely must use a name like that, I think it'd be a better fit and less stressful on the family poodle.

Naming your child with a last name that ends in a vowel along with a last name that also starts with that vowel isn't a very good idea because the names tend to run together. ("Eva Anderson") Also, try not to give your child a name that rhymes or is similar to their last name. It will be confusing. ("Jettie Pettit") And please, stay away from pun names like "Holly Wood" or "Bud Weiser". It may be cute for about five minutes when the baby's born, and then what? Eventually it will get old. Then your child would be stuck with that horrible name for the rest of their life.

Names that are difficult to spell or pronounce

In the years to come, names that are difficult to spell or pronounce are often misspelled and mispronounced by people and after a while, your child will get tired of correcting them. Imagine it's the first day of school. Each teacher that comes in would like your child to introduce them self, starting with their name. If their name is hard to pronounce, it may take a while for their teacher to get the correct pronunciation. In the mean time, your child would have to tolerate with that teacher mispronouncing it. And not just with one teacher, it's with all the teachers that come in. It may not be very important, but how would you like your name constantly being mispronounced? Same thing applies with popular names that have been given a different spelling to the traditional one. (Jessica and Jesika)

Names that don't match

Don't choose a name for your child that obviously would not suit them when they are older. If you want to give your child a name that reflects their background and culture is perfectly fine, but be sensible. It may be odd for your blue-eyed, blond-haired daughter to be given an Indian name like Parminder.

Using place names

This is not actually a no-go area, and some place names make very nice names for your baby. Some places actually make quite good names for kids. Like for football player David Beckham and his wife Victoria, they chose to name their son Brooklyn, after the place he was conceived. But please, do use your common sense on this. It won't be a good idea if your child was conceived in Wet Beaver Creek (Australia).

Think about their future

Choose your child's name carefully. Don't give him or her a name that will scar them for the rest of their life. Most kids are picked on at school because of their name. For instance, if your baby boy has red hair, don't name him Garret. The other kids at his school might call him Garret the Carrot.

CHOOSING UNUSUAL BABY NAMES

Nowadays, fewer parents are naming their kids with traditional and classic names, trying to find a different, refreshing name for their child. Because of this, finding a really unique name is becoming much harder.

These are some helpful tips that we think may help you into finding an unusual, yet comfortable name for your child.

Traditional (Unusual Baby Names):

There are still the traditional ways of selecting your baby's name. The first, of course, is using a name that has been in the family for years - perhaps the name of an aunt or uncle, or a grandparent. The other way is to browse through the Baby Names Dictionary's 28,000+ names to select from. Although some of the names are common, you can certainly find some unusual names.

Name meanings:

To choose a unique name, you could decide on what you want your child's name to mean. Baby Names Dictionary has a resource where you can type in what you want your child's name to mean. From there, we will pull out a list of names, both popular and unusual, with that meaning.

Place names:

A lot of parents nowadays are using this method to name their child. Some places actually make pretty good names, but because the method is becoming popular, naming your child after the place she or he was born may not make a very uncommon name anymore. Places like Colorado, Phoenix, Denver or Salem are some popular names for boys. As for the girls, Paris, Vienna, Asia and Atlanta are some of the preferred names.

Names from nature:

Words from nature are also a unique way of naming your kids. That way, the beauty of that word is in your child's name. How about something like Raine, Leaf, Sky or Dew?

Using a surname as a first name for unusual baby names: This is also another method of naming that is becoming more and more common. It means taking the surnames of your ancestors, famous people, or anyone of your choice and using it as a first name. Like for girls, some popular surnames used as first names are McCartney, Bronte, Liotta and Piper. For boys, Beckett, Addison, Brewster, Donovan and Jenson are popular.

Anagrams:

Want a unique name for your child but there are a few traditional ones that you really like? Take that name and create an anagram of it. Use Scrabble tiles from the game and shift the letters or add a few more. Be creative. Let your imagination run wild.

Telescoping:

Take the name and drop letters until you've found a name you like. Kahlil and Gibran can be combined and then telescoped to Kabran. Schuyler can be telescoped to become Sky. Get the picture?

From the father's name:

You can name your child after their father. For example, if the father's name is Donald, his son can be Doni or his daughter, Donnie. Or John. It can be changed to Joanie, Joanna or Jonalie.

From the mother's name:

Naming a boy after his mother's maiden name is one way of doing it. You could change the mother's name to a suitable name for a boy. Like Mary, you could alter it to Martin, Matt, Mason or Marren. Or if it's a girl you could name her Marii, Marinne or Marine.

Name or word combinations:

This means a name taken from combining two other names; most of the time it's from the child's parents or grandparents. For instance, let's say a couple, Ridge and Brooke, have a baby girl. They could combine their names together and name her Bridgette. This may not be very unique, but you get the idea. A better example would be David and Trina. (Davina) This way, you get an unusual name for your child and at the same time, you can honor a family member.

Change the spelling:

Make an ordinary name more unusual by changing the spelling. Like Caitlin, it can become CaitLin. You could change Rianne to RiAnne. Or, you also could add an apostrophe, and Janet becomes J'Nette/J'Net.

Unique names are fun, different and anything goes! Its only limitation is your imagination. Names are inspired from everywhere, from fashion designers to colors to months. June and April make nice names for girls. Azure, Gray and Burgundy are also great names. Countries or states like Dakota or Carolina are also used. But remember, with every pro, there's a con.

Names that are very complicated to pronounce or spell, although it makes them stand out, it also brings aggravation to your child because they would have to constantly correct the spelling or pronunciation for the rest of their life.

Oh yeah, and also, giving a boy a girl's name or vice versa is something you absolutely do not want to do. Imagine the amount of teasing he or she would get from their classmates. Not something you would want for your child, to be laughed at and teased. Howard O'Brien is now Anne Rice, author of the famous vampire books. She was given a boy's name because her folks wanted a boy!

Overall, unique names are not a bad thing. Just be kind to your kid and choose wisely.
